Experienced Java Back-End Developer & Specializing in Spring Ecosystem with QA Automation Test

Agile Methodologies ■ RESTful APIs ■ QA ■ Microservices ■ AWS Cloud ■ Apache Kafka ■ Docker ■ Kubernetes

C2C / Corp-to-Corp Available | Green Card Holder — No Sponsorship Required

- Experienced Java Back-End Developer and QA with years of experience and a strong background in creating secure and scalable back-end software solutions.
- Skilled in Object-Oriented Design, Java OOP, and Spring Ecosystem. Proficient in Oracle Database management, troubleshooting, and ensuring data integrity.
- Effective collaborator with a proven track record of resolving complex issues and delivering high-quality results.
- Experienced in client interaction and understanding business workflows.
- Committed to following software development best practices and fostering solid relationships with colleagues. Strong analytical skills and proficiency in writing clear technical documentation.
- Capable of handling concurrent tasks, managing configurations, and generating reports.
- Fully authorized to work in the U.S. (GREEN CARD HOLDER). Multilingual: English, Russian, Turkish, Uzbek.

SKILLS

Software Development Life Cycle (SDLC): Agile Methodology, Software Development Process, Agile Development, Scrum, Sprint Planning, Agile Project Management, SDLC

Java and Object-Oriented Programming (OOP): Core Java, Java 17, Java Streams, SOLID Principles, Clean Code, Object-Oriented Programming (OOP), Object-Oriented Design, Design Patterns, Coding Standards, Data Structures, Algorithms, Multithreading

Spring Ecosystem: Spring Core, Spring Boot, Spring Cloud, Maven, Gradle, Spring MVC, Apache Tomcat, Thymeleaf, Spring Data JPA, Dependency Injection, SQL, Oracle JDBC Driver, PostgreSQL, MySQL, PgAdmin, Hibernate, JPA (Java Persistence API), ORM Framework, DAO Patterns, DBMS, NoSQL

Front End: Angular, React, Thymeleaf, HTML, HTML5, CSS, Bootstrap, JavaScript, TypeScript, Responsive Web Design

Version Control, Collaboration, and Project Management: Git, GitHub, Version Control, Jira, Confluence, Jenkins, CI/CD Pipeline, Client Interaction, Collaboration

Microservice, API, and Integration: Microservice Architecture, API Gateway, Apache Kafka, RabbitMQ, Docker, GraphQL, REST API, Kubernetes, CI/CD, DevOps, YAML, XML, JSON

Security and API-related: Spring Security, OAuth2, Keycloak, JWT, Spring API, RESTful APIs, SOAP, Web Services, Postman, Swagger, Open API, Application Programming Interfaces (API)

Testing and QA: Spring Testing, JUnit 5, Unit Testing, Integration Testing, TDD (Test-Driven Development), BDD (Behavioral-Driven Development), Spring AOP, SLF4J, Mockito, Cypress, Selenium WebDriver, Cucumber, Automated Tests, Debugging

Cloud and DevOps: AWS Cloud, Amazon Web Services, Lambda, Docker, Kubernetes, Linux, Splunk, DataDog, Kibana, Elasticsearch, Jenkins, Terraform, Configuration Management, Deployment

Databases: PostgreSQL, MySQL, Oracle Database, MongoDB, Cassandra DB, Redis, NoSQL, SQL, PgAdmin, Data Analysis

AI-Assisted Development: GitHub Copilot, Amazon Q Developer, Kiro CLI, Prompt Engineering, AI Code Review, Rule-Based Agents, Cloud AI Integration

PROFESSIONAL EXPERIENCE

Java Back-End Developer

Spectrum Charter Communication. Contract, Remote

United States

08.2024 - Present

- Improved system performance by 15% through Internet Provider platform by designing Event-Driven microservices using Java 17, Spring Boot, and Apache Kafka for high-throughput message processing across 12+ services.
- Enhanced the user experience by 10% and increased team productivity through developing an intuitive Back end, implementing project management functionalities, and utilizing Spring MVC RESTful APIs (3.0), Java (17), Microservices, Kubernetes, Kafka, GraphQL orchestration, and OpenID for secure authentication.
- Reduced production errors by 25% by implementing solutions to prevent project deletion with open tickets, utilizing Git, GitHub, Jira, Maven, Splunk, DataDog, JUnit 5, Kubernetes, MongoDB, Cassandra DB for container orchestration, and integrating OpenID for enhanced security measures.
- Leveraged AI-assisted development tools including GitHub Copilot, Amazon Q Developer, and Kiro CLI for accelerated code generation, automated testing, and prompt engineering with rule-based agents to streamline development workflows and Cloud AI integration.

Java Back-End Developer

OnTrac. Contract, Remote

United States

09.2022 - 08.2024

- Improved system performance through Transportation, Logistics, Supply Chain and Storage optimization by building scalable logistics platform using Java, Spring Boot, and Microservices architecture serving 5,000+ daily transactions.
- Enhanced the user experience by 10% and increased productivity through developing an intuitive UI, implementing project management functionalities, and utilizing Spring MVC RESTful APIs, Microservices, Kubernetes orchestration, and OpenID for secure authentication.
- Reduced deployment errors by 20% by implementing solutions to prevent project deletion with open tickets, utilizing Git, GitHub, Jira, Maven, Spring AOP for cross-cutting concerns including logging and transaction management, JUnit 5, Mockito, Kubernetes for container orchestration, and integrating OpenID for enhanced security.

EDUCATION AND PROFESSIONAL DEVELOPMENT

- Bachelor of Science in Industrial Engineering, Cyprus International University, Nicosia, Cyprus 01.2013 - 08.2018
- Accounting and Auditing Diploma, Tashkent Bank College, Tashkent, Uzbekistan 01.2008 - 12.2012
